

Homework 2

$$\text{Info}(D) = I(9,5) \stackrel{\text{Yes, No}}{=} -\frac{9}{14} \log_2\left(\frac{9}{14}\right) - \frac{5}{14} \log_2\left(\frac{5}{14}\right) = 0.940$$

$$\begin{aligned} \text{Info}_{\text{age}}(D) &= \frac{5}{14} I(2,3) + \frac{4}{14} I(4,0) + \frac{5}{14} I(3,2) \\ &= 0.694 \end{aligned}$$

$$\begin{aligned} \text{Info}_{\text{Income}}(D) &= \frac{4}{14} I(2,2) \stackrel{\text{high}}{+} \frac{6}{14} I(4,2) \stackrel{\text{medium}}{+} \frac{4}{14} I(3,1) \stackrel{\text{low}}{=} \\ &= 0.911 \end{aligned}$$

$$\begin{aligned} \text{Info}_{\text{Student}}(D) &= \frac{7}{14} I(6,1) \stackrel{\text{yes}}{+} \frac{7}{14} I(3,4) \stackrel{\text{No}}{=} \\ &= 0.788 \end{aligned}$$

$$\begin{aligned} \text{Info}_{\text{Credit-rating}}(D) &= \frac{6}{14} I(3,3) \stackrel{\text{excellent}}{+} \frac{8}{14} I(6,2) \stackrel{\text{fair}}{=} \\ &= 0.892 \end{aligned}$$

Gain	Age	=	0.940 - 0.694	=	0.246	*
	Income	=	0.940 - 0.911	=	0.029	
	Student	=	0.940 - 0.788	=	0.152	
	Credit-rating	=	0.940 - 0.892	=	0.048	

$$\text{Age} \leq 30$$

$$\text{Info}_{\text{age}}(D) = I(2, 3)$$

$$= 0.971$$

$$\text{Info}_{\text{Income}}(D) = 2 \overset{\text{high}}{I(0, 2)} + \frac{2}{5} \overset{\text{medium}}{I(1, 1)} + \frac{1}{5} \overset{\text{low}}{I(1, 0)}$$

$$= 0.4$$

$$\text{Info}_{\text{Student}}(D) = \frac{2}{5} \overset{\text{yes}}{I(2, 0)} + \frac{3}{5} \overset{\text{no}}{I(0, 3)}$$

$$= 0$$

$$\text{Info}_{\text{Credit-rating}}(D) = \frac{2}{3} \overset{\text{excellent}}{I(1, 1)} + \frac{3}{5} \overset{\text{fair}}{I(1, 2)}$$

$$= 0.951$$

Gain

$$\text{Income} = 0.940 - 0.4 = 0.571$$

$$\text{Student} = 0.940 - 0 = 0.971 *$$

$$\text{Credit-rating} = 0.940 - 0.951 = 0.020$$

$$\text{Info}_{\text{age}}(D) = I(3,2)$$

$$= 0.971$$

$$\text{Info}_{\text{Income}}(D) = \frac{3}{5} I(2,1)^{\text{high}} + \frac{2}{5} I(1,4)^{\text{low}}$$

$$= 0.951$$

$$\text{Info}_{\text{student}}(D) = \frac{3}{5} I(2,1)^{\text{yes}} + \frac{2}{5} I(1,1)^{\text{no}}$$

$$= 0.951$$

$$\text{Info}_{\text{credit-rat}}(D) = \frac{2}{5} I(0,2)^{\text{excellent}} + \frac{3}{5} I(3,0)^{\text{fair}}$$

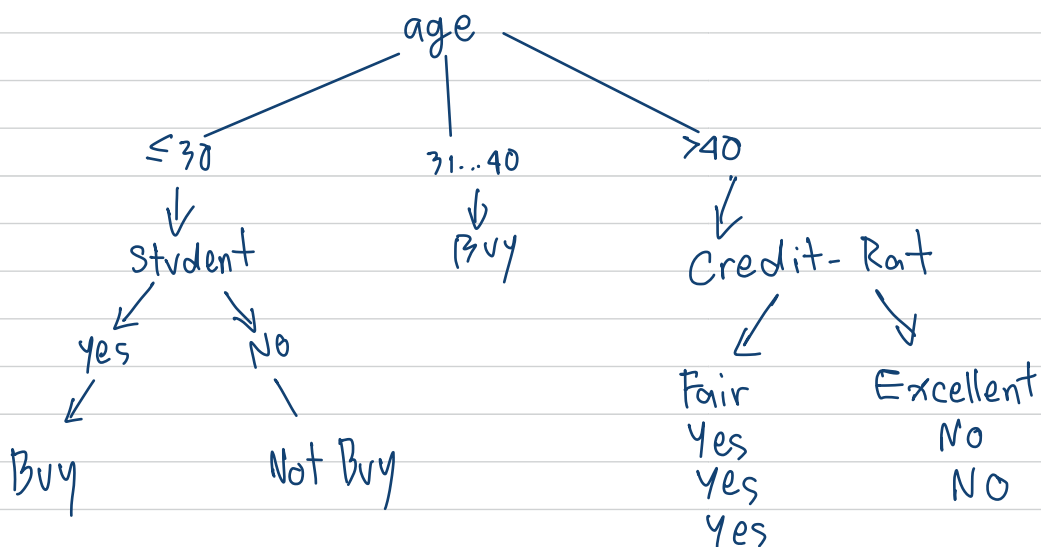

$$= 0$$

Gain

$$\text{Income} = 0.940 - 0.951 = 0.020$$

$$\text{Student} = 0.940 - 0.951 = 0.020$$

$$\text{Credit-rating} = 0.940 - 0 = 0.971 \star$$
